

THE NUMBER ONE CHOICE FOR BITCOIN PRODUCTION

- ▶ Among the top three largest Bitcoin operations
- ▶ 80,000 Bitmain servers spread across 14 sites
- ▶ 0.055 AED/kWh (\$0.015), the lowest price
- ▶ Leader in Bitcoin production costs

The Most Efficient and Economical Bitcoin Production in the Industry

At Fodina One, we offer a competitive solution for Bitcoin production. We specialize in sales and management of servers specifically designed for Bitcoin creation.

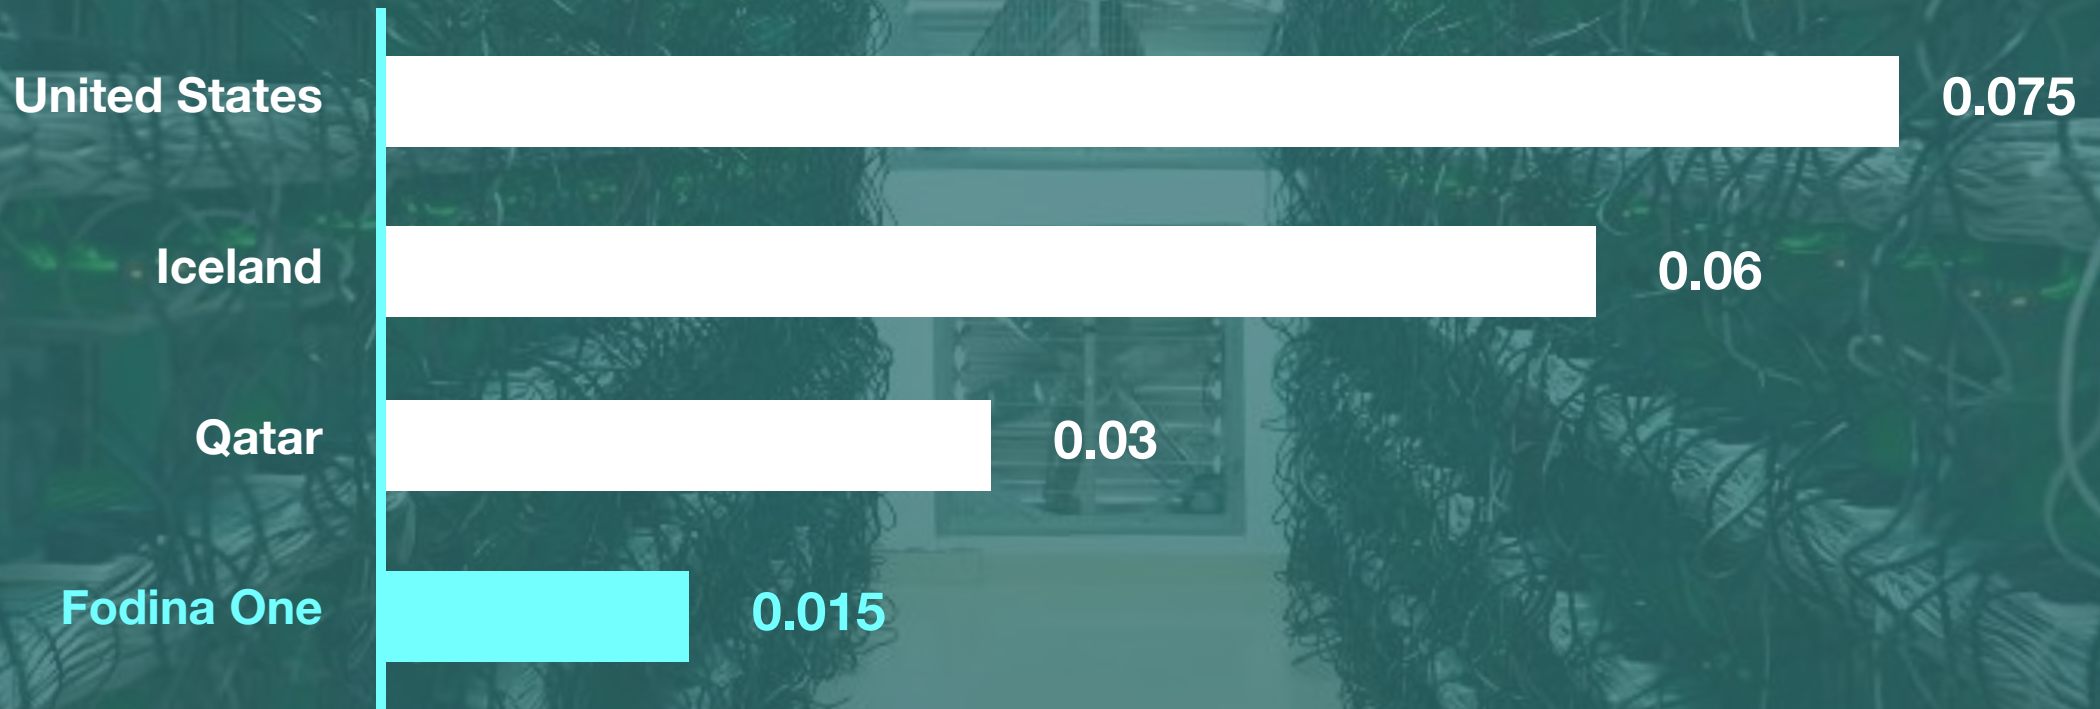

The key factor in the Bitcoin creation process is energy cost. We benefit from the cheapest kilowatt-hour price available for Bitcoin production on the market, 0.055 AED/kWh (0.015 USD). With over 80,000 Bitmain servers spread across 14 production sites in the United Arab Emirates, we are among the top three largest Bitcoin operations, and the leader in production costs, maximizing benefits for our client-partners.

Our optimal server management, from installation to maintenance, and Bitcoin transfer to our client-partners, is handled by a team of over 200 engineers who oversee operations 24/7. Each mining farm utilizes a "water curtain" cooling system, six times more energy-efficient than traditional electrical cooling, ensuring optimal mining conditions for 10 months a year.

By leveraging our advantageous kilowatt-hour rate, the lowest in the market, optimized energy management, and the most competitive overall management fees in the industry, we ensure stable and advantageous Bitcoin production operations for our client-partners.

(in U.S. dollars per kilowatt-hour)

#Bitcoin

Themes driving Bitcoin adoption

- ▶ **Digital store of value**

A rare, global, decentralized asset that can serve as a "store of value" akin to the role gold has played for some investors.

- ▶ **Geopolitical and monetary hedge**

An expression of increasing global disorder and declining trust in governments, banks, and fiat currencies.

- ▶ **Blockchain adoption**

As the leading cryptocurrency, Bitcoin's performance is widely seen as a key indicator of global blockchain adoption.

#FodinaOne

Themes driving our client-partners to our offering

- ▶ **Top 3 Bitcoin mining operations**

Among the top three largest Bitcoin mining operations, with over 80,000 servers and a team of 200 engineers ensuring continuous supervision since 2017.

- ▶ **Lowest kilowatt-hour cost**

Utilizing the cheapest available energy on the market, representing only 10% of expenses, well below competitors evaluated between 50 to 60%.

- ▶ **Leader in production costs**

Server management, energy efficiency, and optimized production costs ensure optimal Bitcoin creation process.

#PrivateVisit

Come discover why we are the number one choice for your Bitcoin production needs

▶ **Bitcoin Production Site**

You are cordially invited to discover our Bitcoin production site in the United Arab Emirates during a private tour.

▶ **Efficiency Evaluation**

You will have the opportunity to personally evaluate the operational efficiency of our facilities, confirming our commitment to quality, reliability, and transparency.

▶ **Book a Private Tour**

Schedule your private tour by contacting us at contact@fodinaone.com or by filling out the contact form at the bottom of the page.

#CommercialOffer

BITMAIN Antminer S19

- **Hashrate** : 86TH
- **Power Consumption** : 2967 W
- **Unit Price per Server** : \$1100
- **Electricity Cost** : 0.055 AED/kWh
(\$0.015) the lowest in the industry

#Information

Duration	Server management extends over a period of 48 months.
Quantity	The commercial offer includes lots of 100 BITMAIN Antminer S19 Asic Bitcoin Miners, 86TH Hashrate.
Energy	The electricity cost is set at 0.055 AED (\$0.015) per kilowatt-hour, the lowest in the industry.
Deductions	The expenses related to energy, maintenance, and server replacement will be deducted from the Bitcoin production costs.
Remuneration	65% of the Bitcoins produced will be transferred to the client's wallet at the end of the 48-month management period.
Duration	Our offer includes a 90-day setup period followed by a 48-month management duration.
Replacement	The cost of replacing a server will be determined by the prevailing market rate.
Report	An annual productivity report will be provided to the client in the first half of each year.

Bitcoin Performance Compared to S&P 500 and Gold
